

DELETP – ITEM TYPE ‘P’ PURGE

DELETP deletes type P items from the system according to a line buy range, a specified number of months of no historical activity and certain other criteria as explained below. A report can be run prior to updating to view the items to be deleted. A report will also run when you chose to update – if you would prefer not to have a report print then you must enter KILL in the print queue when updating.

1. If the 'P' item has no warehouse records the item master is deleted. In the report, the action shows: "NO WARE RECS"
2. If the 'P' item has warehouse records, but no history records, and no OHB, then the warehouse and master records are deleted. In the report, the action shows: "NO HIST RECS"
3. If the 'P' item has warehouse and history records, but the warehouse has no OHB, and there are no historical quantities for the specified period, and finally, the item history is older than the specified period, the warehouse and master records are deleted. In the report, the action shows: "NO BALANCE"
4. If the 'P' item meets any or all of these criteria and resides on a contract, you have the option to not delete it. If you choose to delete it the contract entry will also be deleted.

```

DELETP RETURN=NCS900 TSS          PURGE SELECTED 'P' ITEMS          ATTENDED
NUM COMMENT----- PRINT-QUEUE COPIES  STATUS----- JOBSTREAM STEP
                                     INCOMPLETE

FROM/TO LINE BUY:          _____  2222
HISTORY MONTHS:           12
PURGE P RECORD EVEN IF ON CONTRACT (Y/N):  N
UPDATE (Y/N) :            N          (N=REPORT ONLY MODE, Y=REPORT/UPDATE MODE)
  
```

As an option, you can also purchase and run ESC02B and ESCFXS prior to running DELETP. ESC02B deletes warehouse records according to certain criteria, and ESCFXS which changes any type 'S' item file records that does not have a warehouse record to type 'P.'
